- ii) **Vitamin profile** (Vitamin D, Vitamin B₁₂, Folic acid)

Important Information regarding Preventive Health Check-up

1. Please **arrive at the hospital between 8:00 am and 8:30 am**.
2. You should be **fasting for 10 hours** before the check-up. Finish your dinner preferably on the previous night by 9:00 pm so that there is at least a 10 hour gap between your last meal and the time of your fasting blood sample.
3. Kindly **bring all your medical records & reports** if you have been suffering from any ailment.
4. Drink 2-3 glasses of water before leaving home as this will speed up your ultrasound which needs to be done once your bladder is full.
5. Wear athletic/comfortable shoes and clothes to facilitate various tests.
6. If you have **Diabetes**, please **do not have** your morning dose of insulin or morning tablets before you come for the check up. **Carry them along with you and have them before breakfast**. If you have any medicines after breakfast, please have them as prescribed.
7. Please **bring your Blood pressure/Cardiac medicines** along on the day of the check up and inform the Coordinator about the medicines you are taking so they can clarify after checking with the doctor if you need to skip any dose.
8. Please **do not smoke** on the day of your check up until you have completed all the investigations.
9. Please **do not apply cream/powder** on your chest when you come for your check up.
10. Kindly carry your first morning urine sample in the containers provided to you.
11. **Breakfast will be provided.**
12. In case, you have been advised an ECHO, kindly take an appointment with your coordinator.
13. The complete summary with all the reports can be collected only after 6th day of the check up. If you wish to collect some reports earlier or get a review earlier than 6th day, kindly inform our PHC coordinator.
